KOVÁCS NORBERT

Frontend Developer | Egyéni vállalkozó

About me

I am characterized by an attitude that wants to constantly improve, I didn't like it when I didn't know something.I'm switched to IT from 12 years of CNC programming,my future plans to become Full-Stack.

- Perfection oriented
- Design oriented
- Problem Solving , Logical mindset
- Team player

Experience

Money and More Zrt.
Frontend Developer
2023.08. - 2024.11.

Used technologies/tools .: React | React Native | Expo | CodeGPT | JWT | ReactDataGrid | Context | MUI | Jira | BitBucket | SourceTree | Slack

I learned a lot at Money and More.I coded a task manager system , for bank/insurance agents with a help of a Senior college.
I coded in Agile development.In the TMS we can see different agents clients data , and you can manage tasks , delete , or update.
With time , we coded this system into a mobile app with React + webView.Because we had many events , we developed a mobile app for managing access , with a help of React Native + Expo
In mid-October, my contract was terminated due to financial cost reduction

Freelance
Frontend Developer
2023.03 - 2023.08

In this few months , i got contracts for small projects and introductory pages,mostly written in ReactJs.

Education

Webler Teachstudio
Junior Frontend Developer Bootcamp
2022.05.14 - 2023.03.15

This is where I first got to know frontend technologies. The course was very detailed and I learned a lot. Here we also learned React, Angular and NodeJs modules. I focused on React, but I am open to learning about other frameworks, such as .: the VueJs.
