KOVÁCS NORBERT

Frontend Developer | Individual contractor

About me

I am characterized by an attitude that wants to constantly improve. As a front-end developer, the most important things for me are user experience, responsiveness, and creating a clean design.

Languages

- Angol B2 - Conversational

Skills

- ReactJs | Typescript
- CSS | SCSS | Bootstrap | MUI | TailwindCss
- Redux | React Context
- React Native | Expo
- React Query
- Git | Github
- Bitbucket | Jira | SourceTree | Slack | Vitest

Soft Skills

- Attention to details
- Perfection oriented
- Design oriented
- Problem Solving, Logical mindset
- Team player

Experience

Freelance
Frontend Developer. **2025.01 -**

React | JS - TS | Redux | React Query | Tailwind | SCSS | Jira | ChatGPT | BitBucket | SourceTree | Slack | Canva | Figma

The IT crisis hit me too, so I returned to freelance assignments. Among my assignments, there was also a more serious web application for which I used Redux together with React Query. Upwork is the platform and Fiverr is where I look for assignments and jobs. Mostly i apply for designer and frontend jobs.

Money and More Zrt.
Frontend Developer. **2023.08. - 2025.01.**

React | React Native | Expo | CodeGPT | JWT | ReactDataGrid | Context | MUI | Jira | BitBucket | SourceTree | Slack

I learned a lot at Money and More. I coded a task manager system, for bank/insurance agents with a help of a Senior college. I coded in custom **CRM - MIS** systems, with **agile** development. My main task was the full development of custom components and the creation of complex forms. We coded this system into a mobile app with React + webView. Because we had many events, we developed a mobile app for managing access, with a help of **React Native + Expo**
In mid-October, my contract was terminated due to financial cost reduction.
I also have a reccomendation letter from the company, that i can show.

Freelance
Frontend Developer. **2023.03 - 2023.08**

React | JS | Context | MUI | Jira | BitBucket | SourceTree | Slack | Canva | Figma

In this few months , i got contracts for small projects and introductory pages, with few designer jobs as well.

Education

I am constantly improving myself. Technologies learned through self-study:

Redux | React Query | Typescript | TailwindCss

Webler Teachstudio
Junior Frontend Developer Bootcamp
2022.05.14 - 2023.03.15

This is where I first got to know frontend technologies. The course was very detailed and I learned a lot. Here we also learned React, Angular and NodeJs modules. I focused on React, but I am open to learning about other frameworks, such as .: VueJs, ThreeJs.

Other skills

High level of computer knowledge .

At a hobby level, video editing and audio editing are not far from me. I love the creative workflows./Davinci Resolve

I type quickly, and understanding English texts is not a problem either.
